Office Action Summary

DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4 are, drawn to a copper alloy wire composition, classified in class 420, subclass 469+.
 - II. Claims 5-7 are, drawn to a stranded copper alloy wire conductor, classified in class 174, subclass ?
 - III. Claims 8-11 are, drawn to a coaxial cable, classified in class 140, subclass ?
 - IV. Claims 12-14 are, drawn to a process for producing an ultrafine copper alloy wire, classified in class 148, subclass 679+.
2. The inventions are distinct, each from the other because:

Inventions IV and I-III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other and materially different product such as Al base alloy wire. Groups I to III have different physical structures. A restriction requirement may be withdrawn

if a clear admission is submitted by the applicant that the unpatentability of Group I invention would imply the unpatentability of the Group II - IV or in any combination of inventions. *In re Lee*, 199 USPQ 108 (Cmr. Pats. 1978).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Alfred A. Stadnicki on December 6, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be
